

## MOTION

Several pending and approved development projects are located in the vicinity of Tujunga Canyon Blvd (south of Foothill Blvd.), Honolulu Avenue (between Tujunga Canyon Blvd. and Lowell Avenue) and La Tuna Canyon Road (between Tujunga Canyon Blvd. and the Foothill Freeway). These areas will be collectively referred to herein as the Study Area.

Current traffic levels in the Study Area are at near capacity during peak hours, and there is concern that the cumulative impacts of approved and pending projects will increase hazards in his already hazardous area.

I THEREFORE MOVE that the Department of Transportation be directed to undertake a comprehensive assessment of 1) current traffic conditions in the Study Area and 2) the projected impact of approved and pending projects on traffic conditions in the Study Area.

I FURTHER MOVE that the Department of Transportation be directed to report back to the Transportation Committee of the City Council within 60 days with the results of such assessment together with its recommendations for street improvements needed to handle the cumulative impacts of approved and pending projects.
